# Introduction to Bottled Water Coolers

With **over 2 million reusable Eden water cooler bottles filled every year**, it's fair to say we have some experience in bottling!

## Water Delivery

We can deliver and install your water cooler anywhere in the United Kingdom. Customers with bottled water coolers receive a free scheduled service (wherever you are in the United Kingdom) to replace or replenish your bottles.

## We have the largest water delivery infrastructure

We operate from 16 depots across the UK and currently have over 90 delivery trucks on the road, with over 700,000 bottles in circulation at any time. The size of our delivery network ensures that your delivery service is completely reliable and that water is never far away.

## We organise your bottled water delivery schedule

When you become an Eden customer, a delivery schedule will be created and tailored to your individual needs. The frequency of delivery can be set to monthly, fortnightly or weekly depending on your water usage and storage capacities. All empty bottles are collected for re-use on your scheduled delivery dates.

**Sanitisation is not the daily cleaning of your Water Cooler...**

The BWCA (British Water Cooler Association) require all bottled water coolers to be sanitised by an expert every 12 weeks – this is automatically scheduled by our team.

**Sanitisation visits are scheduled Monday to Friday.**

## Local Water Sources

Only the purest, natural water is sourced for our bottled water coolers. As Europe's leading water cooler brand, we have the highest standards in quality assurance, hygiene and safety.

- ✓ No chemicals
- ✓ No chlorine
- ✓ No metallic taste

## WaterTrail

- ✓ Most successful sanitisation technology in the world
- ✓ No Chemicals
- ✓ Taps separate to dispense point
- ✓ Anti pinhole leak protection system
- ✓ Dispense nozzle insulated from contamination
- ✓ 100% Sanitisation – Every time

**We take great pride in our water, which comes from natural aquifers located within the UK.**

These protected borehole sources provide the high quality and great tasting water found in every Eden Springs bottle delivered here in the UK.
